## Magic cord

Made in Germany

## Note:

Do not leave in direct sunlight for more than a few hours. Store in dry rooms only.

The magic cord is a permanently elastic rubber cord made from natural caoutchouc, manufactured and covered with double-woven synthetic material. The following illustrations and instructions show only some of the magic cord's many uses. It is very versatile! For PE lessons, as training apparatus at home or for leisure fun outdoors!

## 1 Jumping / hurdling 2 Ducking / crawling 3 Jump and Stretch The magic cord is used as a hurdle Run stooped down or crawl quickly The magic cord is fixed at a height and you must jump over it. If you under the magic cord. that allows you to touch it with do not jump high enough, the both hands when you jump and magic cord bends in order to stretch or to clap hands above the prevent a fall. cord (without touching it). 4 Long jump 5 High jump 6 Forward roll Introduction to high jump: the The magic cord is placed on the The magic cord is fixed in front of magic cord is ideal for training all ground in the shape of a rectangle. the mat.
